

STEEL *Ceilings*

The EDWARDS MANUFACTURING CO.
CINCINNATI, OHIO

CATALOG 180

*Recd
1-11-37*

The appearance of the rooms in which we live or work influences our comfort, happiness and efficiency. It is the purpose of this catalog to offer a decorative ceiling and sidewall treatment which provides the utmost beauty, safety and economy. Ornamental Steel Ceilings are especially useful in remodeling work. Easily applied over stained, cracked or dangerous plaster ceilings, they perform the double service of adding beauty and safeguarding life and property.

Room 819
381 Fourth Avenue
New York, N. Y.

ESTIMATING THE AREA

The lump sum cost of Steel Ceiling material for any room can be quickly determined by using the list prices given in connection with the complete designs shown in this catalog.

The number of squares required is obtained by adding twice the vertical height of the cornice, plus six inches for the lap of the filler, to the full length and breadth of the room, and multiplying the length and breadth thus obtained together. Make no deductions for any skylight, stairway or any other opening measuring less than 100 square feet.

Example: If the room measures 20 x 60 feet and Design No. 2390, having a 6-inch depth cornice, is desired, add 18 inches to length and breadth, as follows:

Size of room.....	20' 0"	x	60' 0"
Add for 6-inch cornice.....	1' 0"		1' 0"
Add for lap of filler.....	6"		6"
	21' 6"	x	61' 6"
equals 13.22 squares			

FIGURING THE COST

Now multiply the number of squares by the proper list price per square of the design selected, and add to this sum the total cost of all cornice mitres required on the job as follows:

13.22 squares @ \$3.75 per sq.....	\$115.68
4 only — 6" cornice mitres @ 40c each	1.60
Total List Price.....	\$117.28

This estimate is based on a plain rectangular room measuring 20 x 60 feet and having no exposed beams or other irregularities which might change the quantity of material or the list price of the design.

The list prices in this catalog provide for the material being painted one coat of paint on both sides before shipping, and include wood brackets for the cornices and nails for applying the metal.

Wood furring strips are extra and are not shipped unless ordered.

Attention: Mr. Waldo Larkhy.

Gentlemen:

We want to take this opportunity to let you know how wonderfully well pleased we are with the metal ceiling you installed in our offices some few months ago. The effect is very beautiful indeed and the suggestion your Service Department offered in covering the beams and breaking up the large expanse of ceiling, has helped very materially to make a very attractive ceiling out of a very unattractive one.

We are also very well pleased with the effect on the ordinary office noises. It seems that your ceiling has a tendency to deaden the sound rather than to accelerate it. We were fearful when contemplating having the ceiling covered that it would increase the noise but we find it works just the opposite way.

We cannot recommend your ceiling too highly.

Yours very truly,

THE FOY PAINT COMPANY
